

SNOWSHOE CATTLE COMPANY

PRIVATE TREATY BULL SALE KICK OFF & OPEN HOUSE

March 28, 2020

At the Ranch Arthur, NE

Selling
45 Hereford Bulls
Yearlings, 18-Month Olds,
Two-Year Olds

A SNOWSHOE
CATTLE COMPANY
SNOWSHOECATTLE.COM

Welcome

What a difference a year makes! Last year at sale time we had no idea that we would soon be making plans to move our entire operation from Montana to Nebraska. It has been a major undertaking and a big change, but a very positive one. We are thankful to our friends and customers for their support and encouragement in our decision to relocate, and for the welcoming kindness of the Sandhills' community.

The first load of cattle made the trip in mid-July, and the pairs made the trip later that month. With the timing of the move, we did not take the herd to their usual summer pasture. We kept them in Pompeys Pillar until the weather permitted us to load up and take them to their new home. We knew we had made the right decision the evening we loaded the semis: The sky lit up with a rainbow as the trucks headed down the driveway. Talk about the promise of what is to come!

The cattle handled the transition well but as can be expected, it definitely impacted our weaning weights this year. Our weights are about 100-150 pounds lighter than usual, however, we are seeing their ability to adapt, and to deliver on compensatory gains. The calves received no creep feed. The yearling bulls have really been taking shape and we believe you will see a significant difference just in the time between the photos being taken and the videos later to come.

To our Montana cattle producers, we invite you to visit us in our new location. We would relish the time to visit, have you view our cattle, and see first-hand our reason for moving to Nebraska. We would also appreciate the opportunity to have our genetics continue to contribute to your success. Your business is very valuable to us, so we will gladly deliver bulls that you purchase to central points in Montana at no cost to you.

This year, the catalog goes out to many whom we have not yet met in person. We invite you to join us for the Open House, or stop in and see us when you are in the area. We look forward to introducing our program to you and learning about yours. We have been working diligently for over 30 years to build a program that provides a balance of traits and believe these cattle are built to complement the cow herds developed by conscientious cattlemen and women of the West.

Please join us for our Private Treaty Kick Off and some hospitality Saturday, March 28th at the ranch.

Sincerely, Bernie & Stacie

Saturday, March 28, 2020

At our NEW Location in Arthur, Nebraska

We are looking forward to seeing
old friends and meeting our new
neighbors.

Selling 45 Hereford Bulls

OPEN HOUSE SCHEDULE

Saturday, March 28, 2020

1 PM (MST) - Open House and
Private Treaty Bull Sale Kick Off.

Our NEW Location

Snowshoe Cattle Company
194 Broken Axle Road
Arthur, NE 69121

SALE CONTACTS

Winter and Birth Weight

We often hear about the effect of sustained cold weather on birth weights. With the time of year that we calve, we have accepted the impact of those conditions as the "norm" and that we see higher birth weights as a result. The past two calving seasons have been a lesson to that fact in particular. The winter affecting our 2018 calf crop set records for snowfall and days of sustained extreme negative temperatures. As a result, we saw a spike in birth weights from the onset of calving. The winter affecting our 2019 calf crop didn't get ugly until February and once again we saw record snowfall and record cold temperatures. Nearly a month later, we saw the impact on our birth weights again with another spike. Fortunately, the impact of selecting for calving ease was also felt in a very positive way. The cow herd required no assistance in delivering their calves. Calving ease was bred-in, and the increased birth weights had no negative effects. If anything, it was a positive influence on the calf's ability to sustain the record setting winters.

THE MATERNAL ADVANTAGE

The Maternal Advantage program seeks the value added by using a Hereford bull on British-based or Brahman-based cows. The Hereford cross generates females with added longevity, more docility, increased fertility and more profit per year.

PREMIUM RED BALDY

The Premium Red Baldy is a tagging program designed to take advantage of hybrid vigor by maximizing the best traits of both Hereford and Red Angus, providing commercial producers with premium replacement females. Premium Red Baldy uses genetics supported by the only two beef breed associations backed by whole herd reporting.

Cattlemen can take advantage of both programs and reap the benefits offered by the AHA: access to a sire EPD summary, added market exposure, replacement selection tools, genetic improvement tools and access to AHA resources, marketing and staff.

HEREFORD ADVANTAGE

Increase added marketing power to your feeder cattle.

The American Hereford Association (AHA) launched a program that will bring recognition to calves sired by a Hereford bull battery that ranks in the top 50% for the Certified Hereford Beef Index (\$CHB). \$CHB is a terminal sire index that is built around Hereford bulls mated to mature commercial Angus cows. This index has significant weight on Carcass Weight, Average Daily Gain, Dry Matter Intake, Marbling, Ribeye Area and Calving Ease. Through careful genetic selection, we are excited that 39 of the 41 bulls offered in this catalog qualify for the \$CHB Hereford Advantage Program.

TWO-YEAR OLD BULLS

The 2-year-old and Fall yearling bulls were turned out on rugged Sandhills pasture for the summer. They received only free choice mineral and no other supplementation until mid-October. With that in mind, the yearling weights on the Fall bulls reflect their true performance and carcass on grass only. Their physiological development on the hills will be added benefit not only to their longevity, but their over-all performance in the breeding pasture.

Bannack is proving himself to be a bull that provides balance in all traits, and he excels in carcass. He is one of the top bulls in the country for carcass trait EPDs: REA, Marbling, Carcass Weight, and lean back Fat. This comes as no surprise with his own yearling scan data displaying a **Rib Eye Area of 18.02 and an IMF of 4.39**. Bannack has earned Trait Leader status in the Hereford Breed for Calving Ease, Sustained Cow Fertility, Carcass Weight, Lean Fat, REA, Marbling, Baldy Maternal Influence (BMI), Brahman Influence Index (BII) and Certified Hereford Beef Index (\$CHB). With a long line of top producing females in his pedigree, he ranks in the top 1% for Sustained Cow Fertility. His first daughters in production are proving to be excellent producers with stout calves and good udders. Bannack is a true combination bull. No compromises.

Mr Canada was our selection from the WLB Livestock Dispersal. He combines the easy fleshing ability and look of his grand sire, Lego, with power and growth. His offspring to date have demonstrated extra growth, bone, style and carcass. We have retained an excellent set of daughters, which are just now hitting production, displaying excellent body capacity, mothering ability and udder quality. We are very excited about the outstanding set of Mr Canada sons in our offering. He has achieved Trait Leader status in both Weaning and Yearling weights.

We made the decision to get in on the ground floor of this young sire due to his eye-appeal, easy fleshing ability, calving ease profile, fertility and carcass merit contributions. We have not been disappointed. He has already proven himself to be a Trait Leader for Calving Ease, Milk, Udder Quality, Marbling and all three Indexes: BMI, BII and \$CHB. We have had great results using him on heifers and the calves are typically marked with his excellent pigmentation. They display his naturally thick and correct phenotype. Some of his first sons available are right here at Snowshoe Cattle.

Palisade brings some outcross genetics to our program, while infusing one of our leading cow families back into the herd. Y04 has REA/WT of 108 on 7 calves and a yearling ratio of 103. She has rightfully earned Dam of Distinction status for her performance and short calving interval. We have two maternal sisters to Palisade that are outstanding proven producers with great udders. He demonstrated his carcass merit with an REA of 14.59 and a REA/WT of 1.26. His long spine and smooth front allowed us to use him very successfully on heifers as well as cows. Palisade is high performing and naturally thick and we look forward to seeing more calves out of this young sire. His first sons are available this year and his maternal brother sells as lot 21G. Owned with Pete Marlane, Circle, MT

SNOWSHOE CATTLE COMPANY

PRIVATE TREATY BULL SALE KICK OFF & OPEN HOUSE

March 28, 2020

SALE LOCATION: Open House is located at Snowshoe Cattle Co at 194 Broken Axle Rd, Arthur, NE 69121. We are between Ogallala and Arthur just off Hwy 61.

PRIVATE TREATY KICK-OFF: Join us for our Open House and Private Treaty Kick-off at 1 PM at the ranch. Enjoy some hospitality and first opportunity to make your selection of the bulls.

TERMS AND CONDITIONS: Terms of sale are cash. Announced changes in catalog information sale day take precedence over printed materials. All cattle are the buyer's property as soon as sold. Insurance on your purchase is recommended. Any person attending the sale does so at their own risk. Neither the owners, nor any person connected with the sale, assumes any liability, legal or otherwise. Registration papers will be transferred upon request.

GUARANTEE: Every animal in this sale is to the best of our knowledge, free from disease or defect. Any known defects will be announced or published prior to purchase. All animals are guaranteed breeders. All bulls selling for \$3000 or more will be guaranteed for one full breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. 100% of the original purchase value of the injured bull, minus full salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian with a copy of the veterinarian's diagnosis provided to Snowshoe Cattle. All claims must be made by October 1, 2020. Injury resulting in death of a bull will not be the responsibility of the Seller. This is an insurable risk that the purchaser can obtain coverage for through a livestock insurance provider.

HEALTH: Health of this herd is excellent. All bulls selling have passed a breeding soundness exam. All bulls have been vaccinated at branding with One Shot Ultra BVD, Inforce 3, Vision 7; at pre-conditioning and weaning with Bovi-Shield Gold 5 and Vision 7. In addition they have been de-wormed at branding with an injectable and at weaning with Safeguard drench. All bulls will be poured again prior to sale day. Individual health papers will be furnished for shipment anywhere in the U.S. Due to variations in each state's health regulations for bulls leaving Nebraska, not all bulls will be able to get a health certificate to go to every state the day of sale

FEEDING PROGRAM The bulls were started on feed at weaning in October and are **not** creep fed. They have been on high roughage feed and free choice grass hay. The bulls have been kept on pasture where they have ample space for health and for good feet and legs. With this program, we have been able to grow the bulls in good shape without excess fat and deliver them to our customers ready for breeding.

ULTRASOUND DATA: Scan data on yearling bulls was not available at press time for the catalog. It will be available at www.SnowshoeCattle.com prior to sale day and provided with yearling weights and scrotal measurements on sale day.

	BW	WW	YW	SC	SCF	MILK	FAT	REA	MARB	\$BMI	\$CHB
SNOWSHOE AVG	2.8	57	90	0.9	18.8	26	0.009	0.49	0.10	385	108
BREED AVG	2.9	51	83	0.9	14.9	23	0.010	0.36	0.09	323	100

What is the Significance of Ultrasound Data?

Ultrasound Adjusted Measurements

Adj. REA - Each bull's ribeye area is measured in square inches and adjusted to 365 days of age. REA is used in the calculation of yield grade.

Adj. %IMF - This measurement is taken across the 11th, 12th and 13th ribs, similar to the measurement taken of a ribbed carcass when determining USDA quality grade. The percent intramuscular fat (marbling) is adjusted to 365 days of age. Note that the testosterone levels in bulls will lower their marbling by one percent compared to their steer and heifer mates. A bull with a 3 to 4 % IMF will produce offspring displaying a marbling score a full percentage point higher likely making the choice grade. (source: David Aborn, Image Livestock Service) This can also be useful in determining the retention of replacement females.

Adj. Backfat - This is the backfat, also referred to as rib fat, measured in inches and adjusted to 365 days of age. Backfat thickness is directly related to the carcass yield grade.

Rib Eye/cwt-This is the adjusted REA divided by the hundred weight of the bull. We strive to produce bulls with a minimum ratio of 1.1

Angus is largely considered the leader for carcass data, and the standard for comparison for marbling in US beef cattle. Below is the 2019 adjusted measurement averages for live-animal ultrasound measures of Angus bulls:

Adj REA
Angus Breed Avg: 12.60
Snowshoe Avg: 13.33

Adj IMF%
Angus Breed Avg: 3.83
Snowshoe Avg: 3.71

Adj FAT
Angus Breed Avg: .28
Snowshoe Avg: .20

By comparison, the 2019 offering of Snowshoe Cattle Polled Hereford bulls is highly competitive to the "yard stick" for the industry!

Adj REA 13.33 Adj. IMF% 3.71 Adj. Fat 0.20

More Ribeye, Less Rib Fat, and competitive IMF – your Snowshoe sired calves will meet the demand of the industry leading programs such as CHB and CAB.

Capture all of the benefits of heterosis by using a Snowshoe Hereford Bull on Angus cows and reap the extra paycheck on added pounds at weaning, plus have the high-quality carcass demanded by Certified Hereford Beef® and Certified Angus Beef® program-driven buyers.

With recent industry news

reporting that there is a consumer shift from Select to Choice beef, the demand for cattle with the ability to marble is very real. At Snowshoe Cattle, we are making our genetic decisions with attention to detail when it comes to carcass quality. We maintain our diligence in developing a balance in all traits: correctness in phenotype, thickness, udder quality, mothering ability, and the ability to perform in a rugged Western climate. The bulls in this offering will provide this balance, without compromise.
