

30+ Years of Balance without Compromise

Annual Bull Sale—Monday, March 27, 2023

Arthur, NE | 1 PM (MDT) | *Online Bidding—[TheLivestockLink.com](https://www.thelivestocklink.com)*

Selling:

**70 Registered Yearling, 18-Month-Old
& 2-Year-Old Hereford Bulls
20 Registered Yearling Red Angus Bulls**

Annual Bull Sale
Monday, March 27, 2023

At the Ranch Arthur, NE

Sale Day Schedule

Noon — Complimentary Lunch

1:00 PM (MDT) — Sale

Visitors are always welcome!

We have been very impressed with the performance offered by the Snowshoe cow herd this past year. Despite fighting exceptional drought, the herd thrived and even weaned off our heaviest calves since our move to Nebraska. Not only did they raise heavy calves on limited forages, they also held their own condition which resulted in high conception rates. These easy doing, money making traits are being passed down to each and every bull in our offering and help form a cornerstone in our program.

Bernie & Stacie Buzanowski

This year's offering has faced no shortage of challenges from mother nature, but we are pleased with how they have come through it and believe these bulls will continue to stand up to the test when you take them home.

As you look through the catalog you will notice some new faces. We have added a solid group of Red Angus bulls to our offering. Three years ago we made the decision to expand our operation and our daughter, Rachael, added a Red Angus aspect to our program. Rachael continues to apply the same criteria to her Red Angus as we always have to the Herefords. These Red Angus are a nice complement to our program and embody the standard here at Snowshoe Cattle Co.: **"Balance without Compromise."**

We hope that you will join us Monday, March 27th, 2023 at the ranch and look forward to seeing you

Sincerely,

Bernie & Stacie Buzanowski

& Rachael Buzanowski

Selling 90 Polled Hereford & Red Angus Bulls

70 Registered Yearling, 18-Month-Old & 2-Year-Old Hereford Bulls

20 Registered Yearling Red Angus Bulls

Sale Location

Snowshoe Cattle Company | GPS: 194 Broken Axle Road, Keystone, NE
The ranch is located between Ogallala and Arthur, just off Hwy 61 at mile marker 104.

Terms & Conditions

Terms & Conditions: Each animal will be sold to the highest bidder. The auctioneer will settle any disputes from the auction block. Terms of sale are cash. Announced changes in catalog information sale day take precedence over printed materials. All cattle are the buyer's property as soon as sold. Insurance on your purchase is recommended. Any person attending the sale does so at their own risk. Neither the owners, nor any person connected with the sale, assumes any liability, legal or otherwise. Registration papers will be transferred upon request.

Internet Bidding: If you are unable to join us in person, bidding will be available through the TheLivestockLink.com

Guarantee: Every animal in this sale is to the best of our knowledge, free from disease or defect. Any known defects will be announced or published prior to purchase. All animals are guaranteed breeders. All bulls selling for \$3000 or more will be guaranteed for one full breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. 100% of the original purchase value of the injured bull, minus full salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian with a copy of the veterinarian's diagnosis provided to Snowshoe Cattle. All claims must be made by September 1, 2023. Injury resulting in death of a bull will not be the responsibility of the Seller. This is an insurable risk that the purchaser can obtain coverage through a livestock insurance provider.

Health: Health of this herd is excellent. All bulls selling have passed a breeding soundness exam. All bulls have been vaccinated at branding with One Shot Ultra BVD, Inforce 3 and Vision 7; at pre-conditioning and weaning with Bovi-Shield Gold 5 and Vision 7. In addition they have been de-wormed at branding with Dectomax injectable and at weaning with Valbazen drench and have received two rounds of foot rot vaccine. All bulls will be poured again prior to sale day. Individual health papers will be furnished for shipment anywhere in the U.S. Due to variations in each state's health regulations for bulls leaving Nebraska, not all bulls will be able to get a health certificate to go to every state the day of sale.

Feeding Program: The bulls were started on feed at weaning in September and are **not creep fed**. They have been on a high roughage ration with free choice grass hay. The bulls have been developed in a pasture with ample space to maintain health and encourage good feet and legs. The **Fall Yearlings** summered on sandhill pasture with free choice mineral and minimal supplement. With this program we have been able to grow the bulls in good shape without excess fat, and deliver them to our customers ready for breeding.

Delivery: Free delivery to central points within 250 miles. We will assist all buyers on delivery in the most economical way possible. Bulls picked up and paid for the day of the sale will receive a \$50 discount.

Hereford Advantage

Increase added marketing power to your feeder cattle.

The American Hereford Association (AHA) launched a program that will bring recognition to calves sired by a Hereford bull battery that ranks in the top 50% for the Certified Hereford Beef Index (\$CHB). \$CHB is a terminal sire index that is built around Hereford bulls mated to mature commercial Angus cows. This index has significant weight on Carcass Weight, Average Daily Gain, Dry Matter Intake, Marbling, Ribeye Area and Calving Ease.

The Maternal Advantage

The Maternal Advantage program seeks the value added by using a Hereford bull on British-based or Brahman-based cows. The Hereford cross generates females with added longevity, more docility, increased fertility and more profit per year.

Premium Red Baldy

The Premium Red Baldy is a tagging program designed to take advantage of hybrid vigor by

maximizing the best traits of both Hereford and Red Angus, providing commercial producers with premium replacement females. Premium Red Baldy uses genetics supported by the only two beef breed associations backed by whole herd reporting.

Cattlemen can take advantage of both programs and reap the benefits offered by the AHA: access to a sire EPD summary, added market exposure, replacement selection tools, genetic improvement tools and access to AHA resources, marketing and staff.

Videos

Will be available in early March at:
www.SnowshoeCattle.com

What is the Significance of Ultrasound Data?

Adj. REA – Each bull’s ribeye area is measured in square inches and adjusted to 365 days of age. REA is used in the calculation of yield grade.

Adj. %IMF – This measurement is taken across the 11th, 12th and 13th ribs, similar to the measurement taken of a ribbed carcass when determining USDA quality grade. The percent intramuscular fat (marbling) is adjusted to 365 days of age. Note that the testosterone levels in bulls will lower their marbling by one percent compared to their steer and heifer mates. A bull with a 3 to 4% IMF will produce offspring displaying a marbling score a full percentage point higher, likely making the choice grade. (source: David Aborn, Image Livestock Service) This can also be useful in determining the retention of replacement females.

Adj. Backfat – This is the backfat, also referred to as rib fat, measured in inches and adjusted to 365 days of age. Backfat thickness is directly related to the carcass yield grade.

Rib Eye/cwt – This is the adjusted REA divided by the hundred weight of the bull. We strive to produce bulls with a minimum ratio of 1.1.

More Ribeye, Less Rib Fat, and competitive IMF – Your Snowshoe sired calves will meet the demand of the industry leading programs such as CHB and CAB.

Our ultra-sound tech: David Aborn, Image Livestock Service

Two-Year-Old Hereford Bulls

These two-year-olds are a prime example of what the younger bulls in the offering will turn into when they become part of your program. They have been developed on pasture. With plenty of room for exercise, they are sound, fit and ready to go to work.

18-Month-Old Hereford Bulls

These age-advantaged bulls are a very exciting group this year. They weaned off well and then were placed on a limited ration so that they could be developed slowly, in a 100 acre pasture. This program provides outstanding physiological development and over-all performance in the breeding pasture.

Yearling Hereford Bulls

We are especially pleased with this offering of yearling bulls. They weaned off with outstanding performance in drought conditions on wind battered range and mamma's milk. They have demonstrated feed efficiency, muscle development, impressive shape and superb disposition. The bulls have been given lots of space for exercise to develop their feet and legs.

We are very excited to have this Bannack son in service in our pastures. He represents decades of our breeding program and is a genuine composite of outstanding cow families. He blends true maternal performance with growth, carcass, powerful design and impressive pigmentation. He posted a Weaning Ratio of 114 and Yearling Ratio of 104. His carcass scan proved an incredible REA/Wt of 1.53. Outlaw dominates in the pasture and with multiple calf crops on the ground, his calves are proving to be growthy and eye appealing. They display his growth, style, shape, and pigmentation. His first daughters are coming into production and are displaying ideal udders and great mothering ability

We selected Drover as an outcross that would complement our genetic base. He has exceeded our expectations to date with both outstanding sons and daughters. He is balanced and wide based with natural thickness and excellent pigmentation. He has proven to be reliable for calving ease on heifers and is now recognized as a Trait Leader for both Calving Ease and Birth Weight. His sons will surely be able to sire calves that will earn high choice and better on the rail. His daughters are now in production and are beautiful: big bodied, broody with level square udders and small teats. They calve unassisted, are raising outstanding calves and are proving Drover to be a highly balanced genetic package. In addition, his offspring are easy fleshing and efficient which has earned him Trait Leader status for feed efficiency (DMI) as well.

Historic caught our attention due to his reliable calving ease and his ability to produce both powerful sons and broody, high quality females. He also brings longevity, udder quality and carcass as demonstrated by his Trait Leader recognition for Sustained Cow Fertility (SCF), Maternal indexes and REA. He has nicked very well with our program and has some outstanding sons in the offering.

Masterplan impressed us with his curve bending trait profile. He offers tremendous growth and the ability to produce attractive sons with body mass and impressive eye pigmentation. His daughters are packed with proven maternal genetics. He is a trait leader for weaning and yearling weights, scrotal circumference, teat and udder structure, and marbling.

Yearling Red Angus

Our daughter Rachael purchased a group of Red Angus females three years ago and has been diligently culling and improving the cows into a herd we are proud to have here at Snowshoe Cattle. She has applied the same criteria to the Reds as we have to the Herefords for the last 35 years. Rigorous selection pressure for **fertility, phenotype, udder quality and performance** has resulted in an impressive foundation for her herd. This is the first time Red Angus will be included in the sale, but surely not the last. We are excited to include these bulls in the offering and are sure you will not be disappointed.
