

35+ Years of Balance without Compromise

Annual Bull Sale—Monday, April 1, 2024

Arthur, NE | 1 PM (MT) | *Online Bidding—DVAuction.com*

80 Bulls Sell

60 Hereford Bulls
Yearlings &
18-Month-Olds

20 Red Angus
Yearling Bulls

Annual Bull Sale
Monday, April 1, 2024

At the Ranch Arthur, NE
Sale Day Schedule

Noon — Complimentary Lunch

1:00 PM (MT) — Sale

Visitors are always welcome!

First and foremost, thank you for taking the time to look through our catalog and to evaluate our program – a program that is now in its 36th year. Each calving year begins with a new letter, and we are on our second trip through the alphabet.

As we have traveled through these letters, we have worked to avoid the extremes, even the trends. Instead, we breed for balance. We have built on solid cow families that can provide a living for themselves, their calves, and for us. We expect performance with eye appeal, carcass merit and fertility.

Bernie & Stacie Buzanowski

Every year has its challenges, and this past one has been no different. Recent years have brought extreme drought, harsh winter and insects. These trials test both the cow herd and the cattle producer. When we sum up the performance over the past year, we come to some very pleasant realizations. While we did lose some pounds at weaning, with all of these challenges, the fertility in this cow herd prevailed. We have heard some tough stories this year about preg rates, yet this Hereford herd achieved a 92% preg rate.

There is profit in fertility, especially when combined with balance in growth, carcass and phenotype. We invite you to inspect our offering firsthand, prior to the sale, or on sale day.

Sincerely,

Bernie & Stacie Buzanowski
& Rachael Buzanowski

Selling Polled Hereford & Red Angus Bulls

**17 Fall 18-Month Old Hereford Bulls
40 Yearling Polled Hereford Bulls**

17 Registered Yearling Red Angus Bulls

Sale Location

Snowshoe Cattle Company | GPS: 194 Broken Axle Road, Keystone, NE
The ranch is located between Ogallala and Arthur, just off Hwy 61 at mile marker 104.

Terms & Conditions

Terms & Conditions: Each animal will be sold to the highest bidder. The auctioneer will settle any disputes from the auction block. Terms of sale are cash. Announced changes in catalog information sale day take precedence over printed materials. All cattle are the buyer's property as soon as sold. Insurance on your purchase is recommended. Any person attending the sale does so at their own risk. Neither the owners, nor any person connected with the sale, assumes any liability, legal or otherwise. Registration papers will be transferred upon request.

Internet Bidding: If you are unable to join us in person, bidding will be available through the **DVAuction.com**

Guarantee: Every animal in this sale is to the best of our knowledge, free from disease or defect. Any known defects will be announced or published prior to purchase. All animals are guaranteed breeders. All bulls selling for \$3,500 or more will be guaranteed for one full breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. 100% of the original purchase value of the injured bull, minus full salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian with a copy of the veterinarian's diagnosis provided to Snowshoe Cattle. All claims must be made by September 1, 2024. Injury resulting in death of a bull will not be the responsibility of the Seller. This is an insurable risk that the purchaser can obtain coverage through a livestock insurance provider

Health: Health of this herd is excellent. All bulls selling have passed a breeding soundness exam. All bulls have been vaccinated at Branding with One Shot Ultra BVD and Ultrabac 7; at pre-conditioning and Weaning with Bovi-Shield Gold 5, Endovac and Vision 7. In addition they have been de-wormed at Branding with Dectomax injectable and at Weaning with Valbazen drench and have received two rounds of foot rot vaccine. All bulls will be poured again prior to sale day. Individual health papers will be furnished for shipment anywhere in the U.S. Due to variations in each state's health regulations for bulls leaving Nebraska, not all bulls will be able to get a Health Certificate to go to every state the day of sale. **Special Note:** Due to the extreme pinkeye outbreak in the Western States this past year, we have worked with our Veterinarian to develop an autogenous vaccine. All of the bulls in the offering will be fully vaccinated prior to the sale.

Feeding Program: The bulls were started on feed at weaning in September and are **not creep fed**. They have been on a high roughage ration with free choice grass hay. The bulls have been developed in a pasture with ample space to maintain health and encourage good feet and legs. The **Fall Yearlings** summered on Sandhills pasture with free choice mineral. With this program we have been able to grow the bulls in good shape without excess fat, and deliver them to our customers ready for breeding.

Delivery: Free delivery within 250 miles. We will assist all buyers on delivery in the most economical way possible. Bulls picked up and paid for the day of the sale will receive a \$50 discount.

Hereford Advantage

Increase added marketing power to your feeder cattle.

The American Hereford Association (AHA) launched a program that will bring recognition to calves sired by a Hereford bull battery that ranks in the top 50% for the Certified Hereford Beef Index (\$CHB). \$CHB is a terminal sire index that is built around Hereford bulls mated to mature commercial Angus cows. This index has significant weight

on Carcass Weight, Average Daily Gain, Dry Matter Intake, Marbling, Ribeye Area and Calving Ease.

The Maternal Advantage

The Maternal Advantage program seeks the value added by using a Hereford bull on British-based or Brahman-based cows. The Hereford cross generates females with added longevity, more docility, increased fertility and more profit per year.

Premium Red Baldy

The Premium Red Baldy is a tagging program designed to take advantage of hybrid vigor by

maximizing the best traits of both Hereford and Red Angus, providing commercial producers with premium replacement females. Premium Red Baldy uses genetics supported by the only two beef breed associations backed by whole herd reporting.

Cattlemen can take advantage of both programs and reap the benefits offered by the AHA: access to a sire EPD summary, added market exposure, replacement selection tools, genetic improvement tools and access to AHA resources, marketing and staff.

Videos

Will be available in early March at:

www.SnowshoeCattle.com and DVAuction.com

What is the Significance of Ultrasound Data?

Adj. REA – Each bull's ribeye area is measured in square inches and adjusted to 365 days of age. REA is used in the calculation of yield grade.

Adj. %IMF – This measurement is taken across the 11th, 12th and 13th ribs, similar to the measurement taken of a ribbed carcass when determining USDA quality grade. The percent intramuscular fat (marbling) is adjusted to 365 days of age. Note that the testosterone levels in bulls will lower their marbling by one percent compared to their steer and heifer mates. A bull with a 3 to 4% IMF will produce offspring displaying a marbling score a full percentage point higher likely making the choice grade. (source: David Aborn, Image Livestock Service) This can also be useful in determining the retention of replacement females.

Adj. Backfat – This is the backfat, also referred to as rib fat, measured in inches and adjusted to 365 days of age. Backfat thickness is directly related to the carcass yield grade.

Rib Eye/cwt – This is the adjusted REA divided by the hundred weight of the bull. We strive to produce bulls with a minimum ratio of 1.1.

More Ribeye, Less Rib Fat, and competitive IMF – your Snowshoe sired calves will meet the demand of the industry leading programs such as CHB and CAB.

Our ultra-sound tech: David Aborn, Image Livestock Service

Age Advantaged Bulls – Born Fall 2022

Genetics that perform in the toughest conditions. These bulls were along side of their dams during what many have called the worst winter in Nebraska in decades. Their dams not only raised them well, but also bred back in a great display of fertility.

Yearling Polled Hereford Bulls

Resilient: tending to recover from or adjust easily to misfortune or change. Every year has its challenges, weather extremes, insects, and so on, yet these Hereford cattle take it in stride. They have demonstrated feed efficiency, muscle development, impressive shape and superb disposition. They are Range Tested and Resilient.

9 Sons Sell!

Red Angus Bulls

The Red Angus bulls put up an impressive set of carcass results, averaging over 15 inches for Ribeye Area and over a 3.5 on Marbling, all while keeping the average Backfat under a quarter inch. These bulls are packed with meat and marbling, but they don't give up anything on phenotype, being good footed and athletic. In addition, they are all out of functional, good uddered cows that have proven they can perform in the Nebraska Sandhills

» 40L is the youngest Red Angus bull, but he does a great job of keeping up with the older bulls. He ratioed a 108 on WW and a 106 on YW. He is sired by a good calving ease bull and we recommend him on heifers.
