Arthur, NE | 1 PM (MT) | *Online Bidding—[DVAuction.com](https://www.dvauction.com)*

40 Bulls Sell

40 Hereford Bulls
Yearlings & 18-Month Old
10 Open Hereford Heifers

36+ Years of Balance without Compromise

Annual Bull Sale
Monday, March 23, 2026

At the Ranch Arthur, NE

Sale Day Schedule

Noon — Complimentary Lunch

1:00 PM (MT) — Sale

Visitors are Always Welcome!

What an amazing time to be in the cattle business. Sales records have been broken repeatedly and the prediction is that we haven't seen the top yet. With that in mind, we take seriously our responsibility to provide reliable, feed efficient, productive genetics. This is our first offering of Bolder sons and we are very happy with them. We used him heavily on our heifers with dependable calving ease. The body type he provides is high volume, thick and moderate. The added good nature is synonymous with easy, efficient fleshing ability. The Houston and Amplify sons are adding performance and carcass weight and as a result, added value for anyone retaining ownership in their calves.

Bernie & Stacie Buzanowski

The selection process for each of the sires used in our program includes balance in all traits and a genetic foundation in maternal excellence. With the high value of replacement females, it remains our goal to add value to your calf crop with proven maternal performance.

We greatly appreciate our customers and thank you for the trust you have placed in us. We also welcome those who may have just learned of us and the opportunity to share our program with you. The bulls and heifers are developed here at the ranch and we invite you to preview them prior to the sale.

We are excited to announce that we have renovated the Quonset here at the ranch and we will be holding the sale inside, rather than in a tent and we are able to keep the wind out! We hope you will join us Monday, March 23rd.

Best wishes,

Bernie & Stacie Buzanowski

Selling...

40 Bulls Hereford Bulls

Yearlings & 18-Month Old

10 Open Hereford Heifers

Sale Location

Snowshoe Cattle Company | GPS: 194 Broken Axle Road, Keystone, NE
The ranch is located between Ogallala and Arthur, just off Hwy 61 at mile marker 104.

Terms & Conditions

Each animal will be sold to the highest bidder. The auctioneer will settle any disputes from the auction block. Terms of sale are cash. Announced changes in catalog information sale day take precedence over printed materials. All cattle are the buyer's property as soon as sold. Insurance on your purchase is recommended. Any person attending the sale does so at their own risk. Neither the owners, nor any person connected with the sale, assumes any liability, legal or otherwise. Registration papers will be transferred upon request.

Internet Bidding:

If you are unable to join us in person, bidding will be available through [DVAuction.com](https://www.dvauction.com)

Guarantee: All bulls selling have passed a breeding soundness exam. Every animal in this sale is to the best of our knowledge, free from disease or defect. Any known defects will be announced or published prior to purchase. All bulls selling for \$4,500 or more will be guaranteed for one full breeding season, the 90-day period following the first turnout of the bulls. 100% of the original purchase value of the injured bull, minus full salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian with a copy of the veterinarian's diagnosis provided to Snowshoe Cattle. All claims must be made by September 1, 2026. Injury resulting in death of a bull will not be the responsibility of the Seller. This is an insurable risk that the purchaser can obtain coverage through a livestock insurance provider.

Health: All bulls selling have passed a breeding soundness exam. Due to variations in each state's health regulations for bulls leaving Nebraska, not all bulls will be able to get a Health Certificate to go to every state the day of sale.

Branding: Vaccinated with BoviShield One Shot Ultra BVD, Ultrabac 7 & Autogenous Pinkeye & Dectomax injectable

Pre-Conditioning: BoviShield Gold 5, Ultrabac 7

Post-Weaning: BoviShield Gold 5, Ultrabac 7 Somnus, Valbazen drench

Prior to Sale: Poured with Ivermectin and vaccinated with Autogenous Pinkeye vaccine and 2 rounds of Fusoguard foot rot vaccine.

Feeding Program:

The bulls were started on feed at weaning in September. They have been on a high roughage ration with free choice grass hay. The bulls have been developed in a pasture with ample space to maintain health and encourage good feet and legs. The **Fall Yearlings** summered on Sandhills pasture with free choice mineral. With this program we have been able to grow the bulls in good shape without excess fat, and deliver them to our customers ready for breeding.

Delivery (Bulls Only): Free delivery to central points within 250 miles on bull purchases averaging \$4,000 or more. We will assist all buyers to arrange delivery in the most economical way possible. \$50 off purchase price of bull if he is paid & picked up sale day.

Recognizing the Best

A cow receiving the **Dam of Distinction** honor is a cow that meets the highest standards of commercial cattle production. The cow must do her job, but also her owner must manage the herd correctly to give her the opportunity to excel. Only a few active cows are recognized. All heifers have the potential to be a Dam of Distinction, but only a small percentage fit the job description of an ideal cow year in and year out.

A Cow Must Have: Initially calved at 30 months of age or less and weaned a calf each year following; Produced at least three calves, maintaining the accepted calving interval; Had a progeny average 205-day adjusted weaning weight ratio of at least 105.

American Hereford Association

ADD VALUE

WITH FEEDER CATTLE & REPLACEMENT FEMALE PROGRAMS

HEREFORD ADVANTAGE

An industry-changing feeder cattle marketing program through IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

MATERNAL ADVANTAGE

A unique marketing program designed to add value to Hereford-sired commercial replacement females with added fertility, feed efficiency, profitability and docility.

PREMIUM RED BALDY

Take advantage of hybrid vigor by maximizing the best traits of Hereford and Red Angus genetics that provide commercial producers with premium replacement females.

18-Month-Old Hereford Bulls

In the fall of 2024, we dispersed our fall calving cows in order to simplify our workload on the ranch. There were a few cows that did not leave, and we have retained the daughters in our spring program, and are offering the 2 sons here. These age advantaged bulls ran on Sandhills pasture for the summer and were started on a limited grain ration and free choice hay in the fall.

» Bolder has been an exciting addition to our program. He is easy fleshing, high volume and incredibly thick – all which he passes along to his offspring. Combine this with his Trait Leader status for Calving Ease and Birth Weight, tremendous maternal power and exceptional disposition – he is truly a balanced and influential bull. We are offering 17 sons and 3 daughters in this sale. The rest of his daughters will be kept with confidence to advance our program.
 » Trait Leader: CE, BW, SCF, MM, MCW, Udder, Teat, and BMI\$
 » Owned with Pelton Polled Herefords, Cody & Shawna Chabot and Semex Beef.

» Now entering his 4th year in our program, Amplify has exceeded our expectations. His offspring display his signature length of spine and neck extension, as well as growth. His sons have power, and his daughters are thick made yet feminine and very attractive. His dam brings a beautiful phenotype and udder quality and was the clincher in choosing this bull. His first daughters are due to calve soon and are eagerly anticipated in production.
 » Amplify is on track to be a trait leader for WW, YW, SC, Udder, Teat, and REA.

» Houston first caught our attention due to his explosive performance in a stylish package. His offspring are square made and high performing and are at the top of the calf crop for weaning weights. With all his performance, he still adds a sleek front end for ease in calving. We calved out our first daughters in 2025 and have been very pleased with their maternal qualities.
 » Trait Leader: WW, YW, SC, MG, Udder, CW, REA, Marbling, BMI\$ and CHB\$

Understanding Hereford EPDS

CE - Calving Ease Direct is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age.

BW - Birth Weight is an indicator trait for calving ease and is measured in pounds.

WW - Weaning Weight is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

YW - Yearling Weight is an estimate of post-weaning growth that is measured in pounds.

SC - Scrotal Circumference Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty.

SCF - Sustained Cow Fertility The AHA's new Sustained Cow Fertility EPD (SCF) is a prediction of a cow's ability to every year through 12 years of age, given she calved as a two-year-old. For example, the daughters of a bull with a 30 EPD would have the genetic potential to have one more calf by age twelve than the daughters from a bull with a 20 EPD. This is equivalent to saying that the daughters are 10% more likely to remain in the herd to age 12.

MM - Maternal Milk The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability.

FAT - Rib Fat The FAT EPD reflects differences in adjusted 365-day, 12th-rib fat thickness based on carcass measurements of harvested cattle. Sires with low, or negative FAT EPDs are expected to produce leaner progeny than sires with higher EPDs.

REA - Ribeye Area EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs.

MARB - Marbling EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades.

BMI\$ - Baldie Maternal Index The Baldie Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows. Traits included in BMI\$ include SCF, WW, Mature Cow Weight, and MM; Dry Matter Intake, Carcass Weight, REA and MARB.

CHB\$ - Certified Hereford Beef Index The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. Traits included in this index include Carcass Weight, Dry Matter Intake, REA, MARB and FAT.
